
In March 2018, Evans City Borough joined Pennsylvania's statewide NPDES General Permit covering municipal stormwater discharges. As required, the Borough operates a Stormwater Management Program (SWMP) to comply with the regulatory requirements established in NPDES Permit #PAG138337 for over three-dozen Municipal Separate Storm Sewer System (MS4) outfalls to Breakneck Creek and its local tributaries.

Enhancing environmental stewardship and improving surface water quality through implementation of the SWMP are goals of the Evans City Borough Council. These will be accomplished using six Minimum Control Measures (MCMs), and their associated Best Management Practices (BMPs), as established in the NPDES Permit.

Stormwater Management Program (SWMP)

NPDES General Permit Information and Compliance Requirements

Brochure #1
July 2022, Rev. 0

MCM #1 - Public Education & Outreach on Stormwater Impacts

- Develop, implement, and maintain a Public Education and Outreach Plan (PEOP);
- Develop and maintain a list of target audience groups within the Borough;
- Annually publish at least one (1) document or website that includes stormwater educational information, a description of the Borough SWMP, and/or information about Borough stormwater management activities;
- Distribute educational materials and/or information to target audience groups.

MCM #2 - Public Involvement / Participation

- Develop, implement, and maintain a Public Involvement and Participation Plan (PIPP);
- Advertise to the public and solicit public input on ordinances, Standard Operating Procedures (SOPs), and Pollutant Reduction Plans (PRP);
- Regularly solicit public involvement and participation using available distribution and outreach methods.

MCM #3 – Illicit Discharge Detection and Elimination

- Develop, implement, and enforce an Illicit Discharge Detection and Elimination Plan (IDD&EP);
- Develop and maintain a map of Borough stormwater assets that shows permit boundaries, urbanized areas, outfall locations, and receiving surface waters;
- Map the entire storm sewer collection system including roads, inlets, piping, swales, catch basins, channels, basin, and other features;
- Conduct dry-weather screenings of stormwater outfalls;
- Enact a stormwater management ordinance or SOP;
- Provide educational outreach on the IDD&EP.

MCM #4 - Construction Site Stormwater Runoff Control

- Borough approval to conduct earth disturbance activities cannot be granted unless the party proposing the activity has a valid Chapter 102 NPDES permit;
- The Borough must notify Butler County Conservation District within five (5) days of the receipt of a building permit application involving earth disturbance activity of one (1) acre or more;
- Enact, implement, and enforce an ordinance to require the implementation of erosion and sediment control BMPs.

MCM #5 - Post-Construction Stormwater Management in New Development & Redevelopment

- Enact, implement, and enforce an ordinance to require post-construction stormwater management from new development/redevelopment projects;
- Develop and implement measures to encourage and expand the use of Low Impact Development (LID);
- Ensure adequate O&M of all post-construction stormwater BMPs at development/redevelopment projects.

MCM #6 - Pollution Prevention / Good Housekeeping

- Identify and document all Borough operations that have the potential for generating stormwater pollution;
- Develop, implement, and maintain an O&M Plan for Borough operations;
- Develop and implement a training program for Borough employees that addresses appropriate topics to further the goal of improving surface water quality.
